But your premium hunting license already includes what you need to be. Aug 10, 2012 À· I already have a lifetime hunting license... Harry Potter and the Deathly Hallows, Part 2 (Blu-ray + Digital) 2009 Registration Code.Q: What are some other ways to increase my voice volume? I like to work in the bathroom, especially when the air is too hot to stand still. And when I use my mic, the room is too noisy, so I can't hear myself. Are there other ways to increase the volume of my voice. I don't want to increase the volume of my speakers. A: You can simply put your mic on a table or any flat surface to mic the bathroom and not have to worry about the noise or if it has feedback. There are a few times when you cannot mic the bathroom. Another room, not the bathroom, is super loud and you really need to cut it out. You are trapped in the bathroom and need to use the toilet. The bathroom is super noisy and you are not sure if you have the privacy level you need for a decent recording. You need to bring someone else in, like a pet, to do the recording. A: Rolling your voice back in your head will give you a more natural tone - look up voice distortion. You could also balance the level of your external mic and your in-ear mic. Get a DAW that has a mix tool so you can do that. You can try to lower the noise level in the bathroom - better positioning of the mic, taking the toilet off the tank/flush assembly. A: What you are asking is called "room tone" It is not the same as what you hear through speakers, rather it is what is produced by every other sound. This includes fan blades cutting wind, the sound made by water running, even rustling clothes in the closet. While the reason for noise is fairly obvious, the reason why you might want to get rid of it is not so obvious. One other method to attenuate room tone is to put a sheet of high absorption material, like carpet padding or an old sheet of carpet, over a large area of the floor. But that takes time and the room will become unusable. You can also try to attenuate the source of the sound, such as moving the
